LaserWriter Plus: No Print or Print Takes Long Period of Time

This article last reviewed: 24 April 1989

Problem: LaserWriter Plus takes a long time to print out or does not print at all.

BEFORE YOU START: Familiarize yourself with the LaserWriter Technical Procedures. Be sure to follow proper ESD procedures.

Cure: Check to see if the upper half rear latch is broken. If it is, replace the upper half rear latch.

Discussion: If the upper unit rear latch is broken off, the gears do not mesh correctly, causing the LaserWriter Plus not to print.

If the problem still occurs, refer to the LaserWriter Technical Procedures troubleshooting section for more information.
