Lisa: Error 38 is No Boot File on Disk

Article Created: 14 May 1991

TOPIC --

When I try to boot a MacWorks disk on my Lisa, I get an error code 38.

This error is placed under an icon with a check in it. It only accesses
the floppy for a brief moment and then gives the error code. It then
prompts me to continue or to choose a startup device (STARTUP FROM...).
When I continue, the above occurs again, over and over. If I choose a
startup device, it gives me the option of the floppy only -- not the HD.

What's going on?

DISCUSSION ---

Error 38 is "No Boot File on Disk." It sounds like the MacWorks disk was
erased. If the disk was good to begin with, you have a hardware problem
with the floppy drive.
