Lisa 7/7: Problems printing proportional-spaced fonts on a DWP

Printing your Lisa 7/7 document in a proportional-spaced (PS) font, such as
12 Point, will yield the following results:

 A. If you're using a standard "fixed" printwheel, characters such as "w",
    "m" and "r" will be oddly spaced.

  B. If you're using a proportional-spaced print wheel, such as the Apple
     Modern 10/12 PS Printwheel, the odd spacing will be less apparent.

You can eliminate the odd spacing entirely by selecting a fixed pitch, such as
12 Point-15 Pitch, and using a fixed pitch printwheel, such as the Prestige
Elite Printwheel.
