Lisa Office System 3.1: Installing with BASIC Workshop 3.0

BASIC Workshop 3.0 is fully compatible with Lisa Office System Release 3.1.

If you wish to install the Office System 3.1 and BASIC Workshop 3.0:

1. Back up your documents currently stored on the hard disk.
2. Install the Office System 3.1. Follow the steps in Chapter 6 of the Lisa Office System manual. Select Erase, then select Share if you wish to share the hard disk with Macintosh software.
3. Install BASIC Workshop 3.0. Follow the steps in Chapter 1 of the Workshop manual. Select Don't Erase when prompted.

NOTE: Running StartUpdate is not required for the BASIC Workshop; as a matter of fact, running it will cause an error to be displayed. Although you must run StartUpdate to update Pascal 3.0, doing so will not harm BASIC.
