LisaTerminal: Copy and Paste from LisaCalc

Before LisaTerminal can receive LisaCalc Copy or Paste information in the appropriate format (in columns), you need to set LisaTerminal's tabs to reflect the width of each column you want LisaTerminal to send. When you don't set the tabs, all of the information appears in one column with spaces between each entry. To set tabs in LisaTerminal, follow the procedure on pages 46-48 in the LisaTerminal manual.

Good Things to Know About Lisa
