LisaList: Capacity

The capacity of LisaList depends on the amount of disk storage space available. But each record (row) has a specific capacity of 990 bytes, with 100 fields (columns) per record.

Note: files that fit on the 5-1/4 disk may be too large to fit on a 3-1/2" microdisk under release 2.0; however, Lisa Operating System 3.0 splits the document among many diskettes if necessary.
