Lisa Pascal 3.0: Can't copy protected file; error 1130

Due to a problem in the Lisa Pascal 3.0 Workshop, the File Manager will not copy a file having the copy protection attribute set (i.e., a file attribute of P); instead, the Filer returns error 1130. The workaround for copying a protected program is to use the Generic Install program, merely a generic version of the Office system and Workshop install programs.
