MacWorks: Dot Matrix Printer Installation

The Parallel Printer Installation Utility enables a Macintosh XL to send print files to a parallel printer, such as an Apple Dot Matrix printer. This utility is distributed on the MacWorks XL System Disk (part number 682-0103-B).

The utility installs the driver on whichever disk contains it, so you should:

1. Copy the utility to the application disk you wish to print to the DMP from.
2. Run the disk's Parallel Printer Installation Utility and follow the instructions.
