MacWorks: Which Lisa boot ROMs to use

The same boot ROMs recommended for Lisa software are fine for systems running
MacWorks. In addition, square pixel ROMs are available for systems running
only MacWorks XL. They are:

```
SYSTEM                CPU       I/O      Sq PIXELS (CPU-I/O is the same)
  Lisa 2/10-Mac XL    F, H      D (88)       A3
  Lisa 2              D, H      B (A8)       A3
```

Although MacWorks has been thoroughly tested with the earlier ROMs, consider
upgrading them if a system with earlier ROMs shows illogical errors, such as
locked disk errors when initializing a disk, which may occur after loading new
system files.
