Apple Phone: Audio on Left Speaker Only (12/93)

Article Created: 22 December 1993

TOPIC -----

When using Apple Phone software on my Quadra 660AV, audio is heard on the left external speaker only. How do I get audio to play on both speakers?

DISCUSSION -----

Apple Phone plays audio through the left channel. This is the equivalent to the internal speaker on the Quadra 660AV. There is no way to play Apple Phone audio on both left and right external speakers.
