Macintosh AV Series: HyperCard 2.1 Audio Palette Crashes (1/94)

Article Created: 7 January 1994

TOPIC -----

I'm using HyperCard 2.1, the HyperCard Audio Palette (in the Audio Help Stack) on my Macintosh AV Series computer. When recording a sound, clicking on the Stop button crashes my computer. Is there a revised version of the stack that works with Macintosh AV Series computers?

DISCUSSION -----

The Audio Help stack, bundled with HyperCard 2.2 and HyperCard 2.2 Runtime (the latter bundled with selected Macintosh systems) is fully compatible with Macintosh AV Series computers.
