Batteries: Apple's Lithium Batteries Meet CFR 173.206 (9/95)

Article Created: 7 January 1992

Article Reviewed/Updated: 26 September 1995

TOPIC -----

I need Materials Safety Data Sheets for all lithium batteries used in Apple products. Our shipper is refusing to ship products until we provide this information.

DISCUSSION -----

The backup batteries used in Apple products contain less than 0.5G of lithium. Therefore, they meet CFR 173.206 (Code of Federal Regulations) requirements and are considered nonrestricted articles in transportation and should not need Materials Safety Data Sheets.
