Apple IIe Card: Includes Applesoft BASIC

Article Created: 13 August 1991

Article Last Reviewed: 3 June 199

Article Last Updated:

TOPIC -----

Does the Apple IIe Card for the Macintosh LC have Applesoft BASIC on it?

DISCUSSION -----

The Apple IIe Card for the Macintosh LC is not an emulation card but an actual Apple IIe on a card. Applesoft BASIC is included in ROM. The card provides 98% compatibility with Apple IIe non-copy protected software programs.

The card does not require a startup disk of any sort. It launches right into Applesoft BASIC.
