Article Last Updated:

TOPIC -----

Does the Apple IIe Card software version 2.0 support printing to the StyleWriter?

DISCUSSION -----

The Apple IIe Card version 2.0 allows printing via print drivers installed in the Macintosh LC computer System Folder. If the StyleWriter driver (or other driver) is in the Macintosh LC System Folder, the Apple IIe Card can print to the StyleWriter (or other printer).

Follow these steps:

- 1) In the Apple IIe Option Panel, place the Printer Card icon in the appropriate slot using the Slots icon in the scrolling icon area. By convention, this is slot 1.
- 2) In the scroll icon area, choose the Print Card icon. This displays the currently selected printer.
- 3) A note in the dialog area indicates that you can select alternate printers via the Chooser desk accessory. Select a printer in the standard Macintosh Chooser.
