## Apple IIe Card: Control Panel vs. Option Panel

Article Created: 6 June 1991

Article Last Reviewed: 3 June 1992

Article Last Updated:

TOPIC -----

How do the Macintosh Control Panel and the Apple IIe Option panel relate to each other?

DISCUSSION -----

They are separate. Printers, keyboard, mouse, and other Macintosh settings have no effect on the IIe side. The only setting that affects the IIe Option Panel is the Monitors setting in the Macintosh. If the Macintosh is set to black and white, the Apple IIe Card only displays black and white data.
