Apple Workgroup Server 95: Setting Privileges (6/93)

Article Created: 11 June 1993

TOPIC -----

Is it possible to assign access privileges from any Macintosh using System 7's file sharing utility?

DISCUSSION -----

Privileges are set by the AppleShare Pro Admin function, or by the administrator account using the "Sharing..." item of the "File" menu of the finder on a client station. A User can also change the privileges for an Item that belongs to that user from the workstation via the "Sharing..." item in the "File" menu.
