## Macintosh IIsi: SCSI Connector

Article Created: 11 January 1991  
Article Last Reviewed: 23 June 1992  
Article Last Updated:

TOPIC -----

What is the power specification for the Macintosh IIsi SCSI connector?

DISCUSSION -----

The only power provided by the Macintosh IIsi SCSI connector, besides logic levels, is the TPWR (Termination power) line. It cannot be used for anything besides supplying termination power for devices on the SCSI bus. Copyright 1991 Apple Computer, Inc.
