ADB: Mouse/Keyboard Security Lockout Not Yet Available

Article Created: 3 January 1988
Article Last Reviewed: 30 June 1992
Article Last Updated: 30 June 1992

TOPIC -----

Is there some way I can lock only ADB devices such as the keyboard and mouse?

DISCUSSION -----

There is currently no application or desk accessory available that locks only ADB devices. The security utilities that are available either lock access to a disk or folder, or disable the drive at system power-down.

The Quadra 900 and Quadra 950 provide a keyswitch which can lock out ADB devices. Currently, they are the only Macintosh computers with this feature.
