## Macintosh II: Always Keep It Horizontal

Article Created: 3 February 1988  
Article Last Reviewed: 30 June 1992  
Article Last Updated:

TOPIC -----

Can I use my Macintosh II in a vertical orientation?

DISCUSSION -----

A Macintosh II, or Macintosh IIX and Macintosh IIIfx, should always be kept horizontal.

Standing it on end  
- voids the warranty  
- defeats the cooling design  
- will eventually damage the main unit.

The above remains true even if the required 4 to 6 inches of clearance is maintained around the vents.
