Macintosh II: 32-bit System Enabler (2/95)

Article Created: 27 April 1993

Article Reviewed/Updated: 24 February 1995

TOPIC -----

This article describes what is needed to use the 32-bit System Enabler with the Macintosh II.

DISCUSSION -----

To use the 32-bit System Enabler, a Macintosh II must have:

- a PMMU
- FDHD (SuperDrive) ROMs
- rev B logic board (required for FDHD ROMs)

See your authorized Apple reseller for these items.
