Macintosh IIci and IIx: 160MB Drives Can Be Interchanged

Article Created: 13 August 1991

Article Last Reviewed: 10 July 1992

Article Last Updated:

TOPIC -----

I want to have interchangeable hard drives between a Macintosh IIx and Macintosh IIci. Can the 160MB Drive for the Macintosh IIci be transferred at some point to a Macintosh IIx and plugged in seamlessly?

DISCUSSION -----

You will be able to move your 160MB drive from the Macintosh IIci to the Macintosh IIx with the addition of a different drive bracket which has just been made available. The drive bracket is Apple Part #805-0952. Copyright 1991 Apple Computer, Inc.
