TOPIC --

If I open the Control Panel and select the Sound CDEV, then move the
Control Panel window to the edge of the screen (either left or right),
then click the "Add..." button to record a sound, the modal dialog window
that opens is almost entirely off the screen. Because I'm unable to click
a button to make this dialog go away, I'm stuck.

DISCUSSION ---

There is a problem with the Sound CDEV. The only configurations affected
are:

    Macintosh LC or Macintosh IIsi, running System 6.0.7 and MultiFinder
    (there is no problem under Finder).

Press Command-Period and you will return to the sound CDEV.
