TOPIC ---

What third-party monitors are compatible with the Macintosh IIsi?

DISCUSSION --

Most multisync monitors that are about 14" should work. There currently
is no third-party two-page or portrait option available for the Macintosh
IIsi's built-in video.

Here is a list of companies whose monitors work with the Macintosh IIsi's
built-in video:

    Mitsubishi
    Relisys
    Seiko
    Sony
    NEC MacSync
    NEC Multisync
    Princeton

To locate a vendor's address and phone numbers, use the vendor name as a
search string.
