Macintosh IIfx: CDC Wren Hard Drive Compatibility (11/94)

Article Created: 17 July 1990

Article Reviewed/Updated: 21 November 1994

TOPIC -----

Is there a way to connect a CDC Wren Series 7 94601 or CDC Wren Series 6 602 to the SCSI port of the Macintosh IIfx? Both hard disks need to be connected synchronously.

DISCUSSION -----

We called Seagate Technical Support and asked them about the two drives mentioned above. They were aware of the CDC Wren 94601 but not the CDC Wren 602. There is a CDC Wren 94602 but it is not compatible with the Macintosh. Note: CDC is a division of Seagate.

There is a specific model of the CDC Wren 94601, the CDC MacWren 94601-1.2GM, that is, according to Seagate, compatible with the Macintosh IIfx; other models of the CDC Wren 94601 are not compatible with the Macintosh IIfx. Driver software and cables are available from a company called Ontrack (Technical Support: 612-937-2121; Sales: 800-752-1333).
