Macintosh II: Upgrade Kits (Discontinued)

Article Created: 4 June 1991

Article Reviewed/Updated: 15 September 1995

TOPIC -----

I want to upgrade my Macintosh II to a Macintosh IIX. What is the correct upgrade part number? Also, when upgrading to a 1.4MB internal drive, must I install a new ROM kit at the same time? Or is the kit included with the IIX upgrade?

DISCUSSION -----

Apple has discontinued the Macintosh IIX Logic Board Upgrade Kit.

As of June 1992, the only logic board upgrade offered for the Macintosh II is the Macintosh IIfx Logic Board Upgrade Kit, Finished Goods part number M0375LL/A.

Once you have upgraded, you needn't buy a complete FDHD (SuperDrive) Upgrade Kit. You need only the internal drive (Finished Goods part number M0247). The FDHD/SuperDrive upgrade has been discontinued.

Article Change History:

15 Sep 1995 - Revised to show discontinued upgrade.
