## Macintosh 512K: Using external 800K drives without a ROM upgrade

Article Created: 3 March 1986

Article Last Reviewed: 31 March 1992

Article Last Updated: 31 March 1992

TOPIC -----

Will the external 800K drive work on a Macintosh 512K?

DISCUSSION -----

The external 800K drives will work on a Macintosh 512K that does NOT have a ROM upgrade. However, to use the external 800K drive with the Macintosh 512K, copy these three files:

1. System
2. Finder 5.1 or greater
3. Hard Disk 20

to your startup disk from the disk "Macintosh System Update for Macintosh 512K".
