630 Family Computers: Not Compatible With Apple IIe Card (7/94)

Article Created: 15 July 1994

TOPIC -----

Is the Apple IIe Card for the Macintosh LC compatible with the 630 Family computers (Macintosh LC 630, Quadra 630, and Performa 630)?

DISCUSSION -----

No. The 630 Family computers operate only in 32-bit addressing mode, so they do not support the Apple IIe card for the Macintosh LC.
