Quadra/LC/Performa 630:Retrospect Crash/Patch 10/94)

Article Created: 24 October 1994

TOPIC -----

Customers who run Retrospect Remote from Dantz Development on a Quadra/LC/Performa 630 series computer, will experience a system error that causes the computer to freeze when backing up to an external SCSI drive.

DISCUSSION -----

Apple has recently released the "630 SCSI Update" which corrects this problem.

The 630 SCSI Update is available from online services, and the Internet.

The READ ME Follows:

630 SCSI Update (1.0)

Copyright 1994 Apple Computer, Inc.

Name: 630 SCSI Update

Version: 1.0

Date Released: September 29, 1994

Who should use it: Macintosh LC630, Quadra 630, Performa 630 series computers.

Description : The 630 SCSI Update extension corrects a problem involving large block SCSI transfers (commonly used by backup programs when backing up data to SCSI DAT Tape drives) where the system may hang. To use this extension drag it on top of your System Folder. It will be automatically placed into your Extensions folder. Reboot your Macintosh.

Please Note: The name of this extension should be "630 SCSI Update".
