Macintosh 630: TV Tuner Card only for U.S. (3/95)

Article Created: 30 March 1995

TOPIC -----

I want to purchase the Macintosh 630 TV Tuner card, but I also want to use it when I travel to Europe and Australia. Can I use the TV Tuner Card outside the United States?

DISCUSSION -----

The United States uses an NTSC video signal, Australia and most European countries use a PAL video signal, which makes it impossible to use the Macintosh 630 family TV Tuner Card outside the United States.

The following computers are in the Macintosh 630 family: Performa 630, Performa 635, Performa 636, Performa 637, Performa 638, LC 630, and Quadra 630.
