## Centris 610 & Quadra 610: How They Differ (10/93)

Article Created: 21 October 1993

TOPIC -----

This article provides a quick-reference table of differences between two similar Macintosh models: Centris 610 and Quadra 610. The Quadra 610 operates up to 22% faster than the Centris 610, which it replaces.

DISCUSSION -----

|                | Centris 610<br>----- | Quadra 610<br>----- |
|----------------|----------------------|---------------------|
| Clock speed    | 20 MHz               | 25 MHz              |
| Integrated FPU | no                   | most configurations |
| Standard RAM   | 4MB                  | 8MB                 |
| Hard Drive     | 80, 230, or 500MB    | 160MB or 230MB      |

In all other respects, these two systems are identical.
