Centris 650: Startup Problems (7/94)

Article Created: 22 July 1993

Article Reviewed/Updated: 28 July 1994

TOPIC -----

I set up my new Centris 650 just as the manual instructed, but it won't power on. What did I do wrong?

The information in this article relative to the Centris 650 is also relevant to the Quadra 650.

DISCUSSION -----

Try reseating the power supply. Most of the time, making sure the power cable is plugged in securely to the rear of the unit and to the power source will solve the problem. Also check that the power strip switch is turned on.

If the problem continues, contact your local dealer or call 1-800-SOS-APPL for further assistance.

Article Change History:

28 Jul 1994 - Added reference to Quadra 650 to aid in searching.
