Elographics Intellitouch: Macintosh AV Compatibility (11/93)

Article Created: 11 November 1993

TOPIC -----

Is Elographics' Intellitouch screen compatible with the Quadra 840AV? I've used this product successfully with a Quadra 700, but when I try it with a Quadra 840AV, the touch-screen function couldn't be activated.

DISCUSSION -----

Elographics provides the following information:

- Their original software does not work with Macintosh AV systems.
- Contact Elographics for the new "MonitorMouse for Macintosh, version 2.0", which is AV-compatible.
