Centris 610: Horizontal Line Flashes Across Monitor (5/94)

Article Created: 20 May 1994

TOPIC -----

I have a Centris 610 and a Apple 14" Color Display (trinatron. screen). On start up there is a 1" horizontal line across the monitor, that flashes once very quickly. This happens right before receiving the "Welcome to Macintosh".

DISCUSSION -----

For a fraction of a second the monitor does display a thick horizontal white line at the lower third of the screen. This is not a sign that the monitor or the Centris 610 has or ever will have a problem. This is a simple anomaly that occurs as the video drivers are being initiated. This is not considered a problem.
