Color Classic: Screen Resolution (2/93)

Article Created: 9 February 1993

TOPIC -----

Can I switch the display to show other pixel resolutions, like 640 x 480?

DISCUSSION -----

No. The Macintosh Color Classic can show only 512 x 384, which is the same resolution as Apple's 12" Color Display.

When you use the Apple IIe card, the Macintosh Color Classic will automatically switch to Apple IIe resolution.
