## Apple System Profiler 1.0.1: Read Me (6/96)

Article Created: 14 Jun 1996

TOPIC -----

This article is the Apple System Profiler 1.0.1 ReadMe file.

DISCUSSION -----

About the Apple System Profiler

Apple System Profiler lets you gather information about the configuration of your computer. The information the Apple System Profiler reports is helpful if you place a call to the Apple User Assistance Center.

If you have one of the computers listed below, we recommend that you install Apple System Profiler on your machine now. Note that you MUST be running Mac OS version 7.5.2 or 7.5.3 to successfully install Apple System Profiler.

- Power Macintosh 9500, 8500, 8100, 7600, 7500, 7200, 7100, 6100, 5400, 5300 and 5200 series.
- PowerBook 5300, 2300 and 190 series.
- Macintosh Performa 6300, 6200, 6100, 5300 and 5200 series.

Apple System Profiler will only install on the computers listed above. Do NOT attempt to install it on any other computers.

To install, follow these steps:

- 1) Locate the Apple System Profiler Installer. It is in the same folder as this document.
- 2) Copy the Installer onto your startup disk. (To copy, drag the Installer icon to your hard disk.)
- 3) Double-click the Apple System Profiler Installer application.

You'll see a confirmation message when installation is complete. The Apple System Profiler is placed in the Apple menu. To use it, open the Apple menu and choose Apple System Profiler.
