- Vendor names.

To help ensure that you have an appropriate version of the application program you intend to use, Apple Computer, Inc., has compiled this list from information received from certain software developers. These developers have recommended certain versions of their software for use with the Macintosh LC computer. This is by no means a comprehensive list of programs or versions of programs that are compatible with the Macintosh LC.

Please contact your dealer or the software developer if you have any questions. They can help you identify the newest version of a particular program or tell you how to upgrade your current version if necessary. For best results, we recommend you use the latest versions of software and hardware products with your Macintosh LC.
