## Macintosh 500 Family: No Nubus Cards Available (6/95)

Article Created: 1 June 1995

TOPIC -----

Can I install a Nubus card in a Macintosh Performa 550 computer?

DISCUSSION -----

The Macintosh 500 family has a processor direct slot (PDS) for expansion. While Apple does make a Nubus adapter card to allow a Nubus card to be used with the PDS, the design of the Macintosh 500 series does not allow enough room to insert the adapter card.

Macintosh computers the 500 family include:

Macintosh LC 520  
Macintosh LC 550  
Macintosh LC 575  
Macintosh LC 580

Macintosh Performa 550  
Macintosh Performa 560  
Macintosh Performa 575  
Macintosh Performa 577  
Macintosh Performa 578  
Macintosh Performa 580
