Macintosh LC: Third-Party Solution For Co-Processor

Article Created: 13 August 1991
Article Last Reviewed: 23 July 1992
Article Last Updated: 10 December 1991

TOPIC ---

Is there any way to install a co-processor into a Macintosh LC?

DISCUSSION --

Apple does not have a co-processor option for the Macintosh LC. However,
our information search, which included the Redgate Macintosh Registry on
AppleLink, provided these third-party solutions:

- "DataLink LC" and "FastMath LC" from Applied Engineering
- "MacCon+ series" from Asante Technologies
- "DaynaPort E/LC" from Dayna Communications
- "Apex" from Second Wave
- "QuikMath/LC" from System Technology Corp.

To locate a vendor's address and phone numbers, use the vendor name as a
search string.
