MacRecorder Driver 1.0: Incompatible with Macintosh Portable

Article Created: 17 April 1991
Article Last Reviewed: 28 July 1992
Article Last Updated: 28 July 1992

TOPIC -----

I'm trying to use Farallon's MacRecorder with my Macintosh Portable running System Software 6.0.7. The files SoundEdit and HyperSound are working fine.

When I place the MacRecorder Driver in the System Folder and restart, the driver doesn't load (the icon appears with an 'X' through it).

DISCUSSION -----

The MacRecorder Driver 1.0 is not compatible with the Macintosh Portable. Version 1.0.2 is the latest version as of July 1992 and it is compatible with the Macintosh Portable and System 6.0.7.

Farallon has sold the MacRecorder software and hardware to MacroMedia (formerly MacroMind) and they're responsible for supporting the product now.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
