## Macintosh Portable and LCD Overhead Projection

Article Created: 18 April 1991  
Article Last Reviewed: 29 July 1992  
Article Last Updated:

TOPIC -----

What LCD overhead projectors are available for the Macintosh Portable?

DISCUSSION -----

You may want to consider Sayett Technology's Datashow HR/MP high-resolution LCD system. You can project graphic screen images from a Macintosh Portable, Plus, or SE. The display contrast of 20:1 puts out bright, clear, projected images with a display resolution of 512x342 pixels for the Macintosh Plus, SE, and SE/30; and 640x400 for the Macintosh Portable.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
