PowerBook: Sleep Mode Power Draw (7/92)

Article Created: 5 November 1991

Article Reviewed/Updated: 31 July 1992

TOPIC -----

How long do the batteries last in the Macintosh PowerBook 100, 140, and 170 when in sleep mode?

DISCUSSION -----

With a full charge, you can expect the batteries in the Macintosh PowerBook family to sleep-discharge down to the software shutdown level in approximately 7 days. The actual number of days may vary depending on the battery and the Macintosh PowerBook.
