PowerBook: External ADB Devices and Wake Up Function (3/95)

Article Created: 9 January 1992

Article Reviewed/Updated: 31 March 1995

TOPIC -----

Can an external ADB device be used to wake up a Macintosh PowerBook computer from the Sleep mode?

DISCUSSION -----

No. ADB devices draw a significant amount of power and would drain the Macintosh PowerBook battery. They are disabled when in sleep mode as a power-saving feature.
