PowerBook: Carrying Cases and Static Electricity (1/93)

Article Created: 26 January 1993

TOPIC -----

I feel static shock when I pull my PowerBook out of its home-made foam-lined carrying case. What should I do?

DISCUSSION -----

You may be damaging your PowerBook. Do one of the following:

- Change to a commercial case designed especially for the PowerBook. A separate article in the Tech Info Library names several manufacturers.
- Wrap the PowerBook in an anti-static plastic bag before inserting it into the home-made case.
