## PowerBook 100: Deactivate AppleTalk if Modem Uses Printer Port

Article Created: 23 December 1991

Article Reviewed/Updated: 3 August 1992

TOPIC -----

You can use the printer port to connect an external modem. However, remember to deactivate AppleTalk in the Chooser before using the external modem.

DISCUSSION -----

You may use the PowerBook 100 printer port to connect to a printer or LocalTalk network, and also to add external serial devices such as a modem. However, when disconnecting from a LocalTalk network and connecting a device like an external modem, be sure to deactivate AppleTalk in the Chooser. If you don't, you'll typically get some kind of serial port error message.
