PowerBook Duo: Internal SCSI Termination (1/93)

Article Created: 12 January 1993

TOPIC -----

Is the drive on the PowerBook Duo internally terminated? Do I need one or two terminators on an external SCSI chain when docked in a Duo Dock or Duo MiniDock?

DISCUSSION -----

The internal SCSI bus is actively terminated. You need only one terminator at the end of an external SCSI chain when docked in a PowerBook Duo Dock or Duo MiniDock.
