Duo: Cure for Screen Flicker (8/93)

Article Created: 6 August 1993

TOPIC ---

Why is my Duo's screen flickering?

DISCUSSION --

This occasionally happens when the screen is set to display the maximum number of grays. You may be able to stop the flickering by adjusting the contrast control. If that doesn't work:

1) Open the Control Panels folder (it's in the Apple menu).

2) Open the Monitors control panel.

3) Select a smaller number of grays.
