PowerBook Duo Family: Power Adaptor (5/94)

Article Created: 13 May 1994

Article Reviewed/Updated: 03 April 1995

TOPIC -----

This article describes the power adaptors used with Macintosh PowerBook Duo computers.

DISCUSSION -----

PowerBook Duo 210, 230, 250, 270c, and 280 computers include a 25 W power adaptor. The PowerBook Duo 280c includes a new 36 W power adaptor which is fully backward compatible with all Duo computers.

The two power adaptors can be identified by the model number listed on its bottom label: M7783 - 25 W adaptor M2693 - 36 W adaptor.

Although the 36 W adaptor can be used with all Duo computers, it is not recommended to use the 25 W adaptor with the Duo 280c system. Use of the 25 W adaptor may cause the battery to drain while using the system in certain configurations and usage patterns.
