PowerBook 270c: Cannot Use Apple HD SC Setup 7.3.5 (11/96)

Article Created: 15 November 1996

TOPIC -----

If you try to reformat the 240 MB hard drive that came in the Macintosh PowerBook Duo 270c computers with Apple HD SC Setup 7.3.5 application (which comes System 7.5.3), the formatting process stops at the verification stage when it produces an error that halts the formatting.

DISCUSSION -----

Apple HD SC Setup 7.3.5 cannot format or initialize the 240 MB hard drive that comes with PowerBook 270c computers. You need to use Apple HD SC Setup 7.3.2, which came with System 7.5, or an earlier version.

There are only two features that are included in Apple HD SC Setup 7.3.5, but are not included in version 7.3.2: support for 4 GB hard drives and support for multiple Macintosh volume partitions.
