PowerBook: Fax/Data Modems (8/92)

Article Created: 2 December 1991

Article Reviewed/Updated: 5 August 1992

TOPIC -----

I read that the Macintosh PowerBook Fax/Data Modem is only a SEND modem. Is it possible that clients can use it as a SEND/RECEIVE (Fax) modem? Can they use some third-party Fax software, such as Abaton, to do a SEND/RECEIVE function?

DISCUSSION -----

The Macintosh PowerBook Fax/Data Modem is limited to Fax send only. It's a hardware -- not software -- limitation.

There are several third-party modems that support both Fax send and Fax receive. Here are some PowerBook Fax/Data Modem suppliers:

- Global Village Communication, Inc.
- PSI Integration, Inc.
- Lifetime Memory Products, Inc.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
