PowerBook Fax Modem: After Wrong Number, Fax Must Be Resent

Article Created: 3 April 1992

TOPIC -----

Configuration:

- Apple PowerBook Fax/Modem Software
- PowerBook 100, 4MB RAM
- System 7.0.1

If something goes wrong with the fax (for example, creating a recipient entry with the wrong phone number so the fax can't get through), I can't hang on to the imaged document and try again. I have to reimage the document.

DISCUSSION -----

If you fax a document with the wrong phone number you'll need to enter the correct phone number and fax the document again. There's no workaround.
